2024 LAND MARKET SURVEY

REALTORS[®] Land Institute National Association of REALTORS[®]

Released April 2025

A Message from the RLI President

"I am proud to share with the industry at large the REALTORS® Land Institute's 2024 Land Market Survey.

Land sales have seen moderate growth over the past two years as the market continues to become more balanced after record sales in 2021. Land values remained strong in 2024 with residential land typically selling in less than 60 days, a positive sign of continued demand for this asset.

I hope landowners and land real estate professionals alike find value in these insights as our industry continues to advance in 2025 and beyond."

Dan Murphy, ALC 2025 RLI National President

NAR Chief Economist's Perspective

"A trade disruption is looming. That's a challenge and an opportunity. U.S. exports could decrease, including that of agricultural products. Softening demand for warehouses and industrial spaces from lower international trade will become evident. At the same time the demand for manufacturing sites from in-shoring of companies back to the U.S. or from foreign companies wanting to boost and expand production in the U.S. should be anticipated.

Land in essence will be bought and sold but with different configurations. There is still an ongoing housing shortage. All the while, the financing of land purchase and land development looks to be modestly favorable later in the year and into 2026."

Dr. Lawrence Yun Chief Economist and SVP of Research, National Association of REALTORS[®]

About the Report

The REALTORS® Land Market Survey is a collaboration of the REALTORS® Land Institute (RLI) and the National Association of REALTORS® (NAR) that started in 2014. The objective of this survey is to gather information and insights about the state of the land market based on land transactions of land real estate professionals who are members of NAR and RLI. The information is intended to be a valuable resource for market intelligence and policy advocacy.

What is a Land Transaction?

The REALTORS[®] Land Institute defines a land transaction as one in which the value of the land is at least 51% of the value of the transaction.

To increase the number of responses REALTORS[®] Land Institute (RLI) and the National Association of REALTORS[®] (NAR) independently sent The REALTORS[®] Land Market Survey to 4997 RLI members and prospects in December 2024. The possibility of duplicate responses is eliminated by the software tracking IPs of participants.

There were 479 responses, of which 91.4% reported a land sale in the last 12 month with the margin of error 2.4% at 95% confidence level. Thus, estimates such as the year-over-year percent change in sales and prices are the average of the annual figures reported by the respondents.

ECONOMIC ENVIRONMENT

Real Estate and Economic Outlook

Summary

Land sales rose 0.7% in 2024, moderating from the previous years.

Land sales increased by 0.7% in 2024, a more moderate rise compared to previous years. According to REALTORS® survey findings, this growth in land transactions underscores the market's resilience and its potential for continued expansion, even amid challenging conditions.

Land value rose to \$20.1 trillion, up from \$17.9 trillion a year ago.

As of 2024 Q4, the underlying value of the land of real estate owned by households totaled \$20.1 trillion, up from \$18.6 trillion in 2023 Q4. According to NAR's estimate, the land value accounts for 42% of household real estate assets based on Federal Reserve Board data on household real estate and the cost of structures. That's a 2% increase from 40% a year ago.

Most land is purchased in under 60 days.

Land sales generally conclude within a 60-day period, while a notable 25% of these transactions are wrapped up in less than 30 days. Particularly in regions 7 the market moves even faster, with most sales closing in under 45 days.

Summary (continued)

Land price growth adjusted to 1.5%.

Land price per acre growth adjusted to a rate of 1.5% on average, in 2024. By type of land, recreational and residential land posted the strongest price growth of 2.4% and 2.2% respectively, which is in line with precovid performance. Remarkably, timber and ranch land prices grew more than before the pandemic.

Regions 8, 9 and 10 were the hottest markets.

Regions 9 and 10 were the markets with the highest increase in land sales in the range of 3% and 2.2%. Also, the biggest land market was Region 10 (21% of land sales), followed by Region 8 (19%).

By state, the states with the largest share of land sales were Texas (15%), Colorado (8%), North Carolina (7.7%) and Georgia (6.2%) accounting for over the third of all land transactions nationwide.

By type of land, most popular sold lands were agricultural (27%), recreational (26%) and residential (20%)

Region 10 has the most expensive residential lands.

Region 10 boasted the highest prices for residential land, commanding up to \$47,500 per acre, underscoring its premium market position. Conversely, Region 8 presented the most economical choices, with land available at \$20,000 per acre.
